

Roller Garage Doors For Your Home

2019/20

Deluxe 77

Our Deluxe 77 roller garage doors are perfect for larger garages, but can be just as easily installed on smaller openings to provide functionality and efficiency while keeping the costs affordable.

This range of doors have a maximum opening width of 16ft, and are well suited for single, large or double-sized garages. All our remote controlled Deluxe 77 roller doors come with two remotes as standard with two occupants in mind, meaning that neither user has to go without the added convenience and ease of use that remote access offers.

ð (12 inch) square roll housing and 95mm (4 inch) guide runners the Deluxe 77 is designed to be as compact as possible to take

Our Deluxe 77 roller garage doors are available in a range of functions to ensure ease of use and an attractive aesthetic.

Compact 55 Product Range

Specification

General

Guide Runner Width:	65mm (2 1/2 inches)
Max. opening height up to:	2285mm (7ft 5")

Compact 55-RC Compact

Max. curtain surface area:	7 square meters
Max. opening height up to:	2285mm (7ft 5")

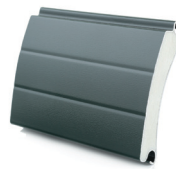

Description

enclosed 205mm square top box it has 65mm wide guide runners making it ideal for garages with limited room or on a budget.

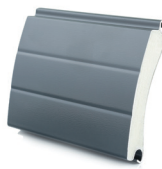

An abstract geometric background featuring diagonal stripes in dark blue, beige, and red. A white line forms a stylized 'L' shape, starting from the top left and extending towards the bottom right. The stripes are composed of horizontal bands of color, creating a layered effect. The dark blue stripe is at the top left, followed by a beige stripe, and then a red stripe at the bottom right. The white line is a simple, clean shape that adds a modern touch to the design.

Free Colour Samples

These are photographic representations of our colours and although we have matched them as close as possible there is nothing like the real thing so we offer free colour samples that can be delivered to you, if you are interested in a sample then please let us know what colour and we will get this arranged for you.

*Please be aware that all colours can vary slightly due to batch variations.

What Makes A Roller Door

Learn a little bit more about what goes into a roller door.

Slats

Made from double-skinned aluminium, our roller door

RD55 slat sizes: 55mm high, 8.2mm thick

RD77 slat sizes: 77mm high, 18mm thick

Benefits Of Double-Skinned Aluminium Slats

- Improved insulation
- Effective deterrent for break-ins
- Reduces sound pollution
- Quiet, smooth function
- Protection against volatile weather

All parts of a roller garage door are made from powder-coated or painted aluminium with rubber seals on the base rail for extra protection.

Roll Housing

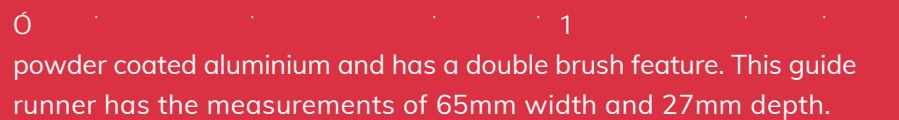

the longer lasting life of the internal mechanism. The enclosed roll housing is constructed out of strong and durable aluminium and can help protect

Our roll housing and guide runners come as standard in white, but we

Benefits Of A Roll Housing:

- Provides a fascia for the door
- Provides the curtain with weather protection all round
- Protects the components of the door from dust or debris that can jam mechanisms
